Affordable Health Care, Housing, Transportation, and Childcare

Student achievement and success strategies encompass best practices that will improve student outcomes including family engagement, mentoring, early college experiences, and support during critical transitions from middle school to high school, high school to college, and during the first-year of college.

A high-quality learning environment is a significant influence on youth development. Educators and care providers in every setting must have access to information about how to best support the youth they serve.

Ensuring that individuals have multiple opportunities to identify and secure meaningful employment and have the necessary supports and credentials to be financially stable. In addition, employers have more access to qualified employees.

Strategies focus on affordable goods and services because having manageable expenses impacts a household's ability to generate disposable income to build emergency savings and create long-term assets for financial stability.

Supporting both youth and adult development of strong financial practices to promote aspirations and long-term financial well-being, and also ensuring that individuals have access to programs and services for which they qualify.
